Message Chairman

By the grace of Almighty Allah, Parkview Medical College is going to begin its 6th year of journey keeping the same mission to establish a Medical College and Hospital for upliftment of health care system, to contribute producing Medical Graduates with highest possible professional skill and a patient friendly low cost but without compromising quality service. From the beginning we have provided sufficient teachers in all the departments as a reflection of our commitment for quality teaching.

Thanks to all students as well as their guardians present and coming year for selecting this developing Institute for the fulfillment of their dream to develop their talent to serve the ailing people of our beloved country and acquire ability to capitalize the rapidly advancing Knowledge and technical skill of Medical Science.

May Allah bless us to achieve the goal.

Dr. Md. Abdul Hye

Chairman

Parkview Health Care (Pvt.) Ltd. Sylhet.

Message

Managing Director

All praises be to the almighty Allah, Who has bestowed his kindness upon us by giving us the opportunity, courage and providing us with enough energy to carryout and establish the Parkview Medical College.

Most of the people of our country are less privileged and unable to receive proper health care. We establish treatment facilities available for our population with minimum cost without compromising service quality.

We hope this college will produce a group of medical graduates with high professional skills and updated knowledge in medical arena who will provide service to the mankind.

I wish to acknowledge with enormous gratitude to all directors, teachers & staff of Parkview Medical College for their huge contribution for the establishment of this institute.

I express my best wishes to all.

Tahmin Farhana Chowdhury

Managing Director

Parkview Health Care (Pvt.) Ltd. Sylhet.

Message

Principal

Parkview Medical College (PMC) started its journey on January 2014, established in private sector in Sylhet divisional city of Bangladesh, with a vision to produce quality medical graduates to meet changing national and international health care demands.

Like all government and private medical colleges of Bangladesh, we follow the same curriculum as developed and approved by Bangladesh medical and Dental Council (BM& DC), with continuous efforts to monitor and attempts to improve it to cover being continuously added new information of medical science.

From the beginning PMC has given emphasis on active learning process to prepare future doctors for their lifelong self directed learning activities. We have sufficient highly experienced and devoted senior teachers who took responsibility of running the academic activities of different departments of the college along with sufficient student-friendly junior energetic teachers to guide the students learning needs. We assure all our beloved national and foreign students to nurture their dream to be fulfilled.

As a part of medical learning process, Parkview Medical College Hospital was established at the same time with all required departments with sufficient supportive manpower and health care providers.

I wish to welcome all present and coming students and their guardians in advance to select this institute as a reflection of their confidence to develop their talent to serve the ailing people in national and global perspective.

Prof. Dr. Dilip Kumar Bhowmik

Principal

Parkview Medical College, Sylhet.

Home

Bangladesh is rapidly becoming a role model for different aspect of health care development among developing countries. It is not possible for a government alone to develop health manpower to cater the increasingly complex, diverse and expensive public health care needs of a developing country like Bangladesh. In addition to government Medical Colleges, Private Medical Colleges in Bangladesh are performing very significant role in producing skilled medical health professionals and providing specialized health care facilities at reasonable cost to downtrodden people of the Country.

To develop a new Medical College, location is a significant factor. Sylhet is considered as Religious Capital of Bangladesh as well as a favoured tourist attraction from national and international perspective. It is blessed with good communication by road, train and air from the capital city Dhaka and from all over the country. In addition to its natural beauty & religious background, Sylhet has over the years transformed itself to an "Education City" with many prestigious public and private Colleges and universities.

We have more than 160 million people. There are opportunity to improve inadequate doctor-population ratio from (1:5000), to an acceptable standard of about (1:500), by more effective involvement of private entrepreneurship. With a view to establish a new medical college & hospital in an attempt to produce expert health manpower as well as to provide a low cost but optimum health care without compromising quality, a group of noble dreamers got together by 2008 under the banner of Parkview Health Care Pvt. Ltd. & Associates of Parkview Health Care Pvt. Ltd. As a consequence, Parkview Medical College has opened its door to 1st batch students of MBBS course from January 2014.

Now we are going to introduce our 9th batch from 2022.

Vision:

To establish a centre of excellence in the field of health and medical education in the country against which other medical establishment will be rated. It will provide opportunity for treatment of latest version of medical science available round the globe and to accommodate medical education to a large number of Bangladeshi residing at UK, USA, Gulf countries and other foreign countries. The Medical College & Hospital is committed to carry out research and development work in the arena of Medical Science.

Mission:

Hospital will set up a low cost specialized treatment facility for the common people which will eventually take shape of a centre of excellence in Bangladesh. There is specific target to create by phases all modern medical techniques and facilities and bring down the cost of treatment to an affordable range for the common people of the country without compromising the standard and quality of service. Hospital is committed to create a comprehensive and integrated health care system and bring it to the doorsteps of the vast majority of the people residing in the rural areas. There is a well established Nursing Institute. We shall start a well equipped Dental College in future.

Facilities :

Parkview Medical College & Hospital is providing round the clock emergency medical services with the help of its own doctors and specialists. Service is available for outdoor patient with the help of concerned consultants. Now we have facilities of 500 beds including ICU, CCU & Dialysis for indoor patients in the hospital and subsequently it will be increased upto 750 bed facilities by stages.

At a Glance

Parkview Medical & Hospital is situated at VIP road, Taltola, which is in the heart of the city, under sylhet city corporation near newly built attractive 'Kazir Bazar Bridge'. Sylhet is the land of Saints and sufis & regarded as the spiritual capital of Bangladesh. It has excellent rail, road, air and river communication linked with the capital city of Dhaka as well as the port city of Chittagong. It takes only 35 minutes by air from Dhaka to Sylhet and 4-5 hours by road.

Total Floor Space of College = 1,60,811 sqft
Total Floor Space of Hospital = 2,52,000 sqft

Course Offered: MBBS
